

# Arshad Mehmood, Ph.D.

---

## Highlights

- Outstanding Ph.D. Dissertation Award • Three years of university-level teaching experience
- Mentored 9 undergrad, 3 Master's, 5 REU and 4 Ph.D. students • Secured 150K GPU hours on NREL HPC systems • Extensive experience with HPC clusters • h-index: 10

## Current Position

May. 2024 **Senior Research Scientist**, *Stony Brook University*, DoIT and Institute for Advanced Computational Science (IACS), Stony Brook, NY.

I conduct independent and collaborative research, support faculty and students with HPC applications, and contribute to grants and publications. I provide scientific user support, develop training materials, and lead workshops. My independent research includes mentoring undergraduates in simulating electronically excited molecules and quantum dots, studying non-adiabatic dynamics, developing and efficient implementation of electronic structure visualization tools on high-performance computer hardware.

## Education

Dec. 2020 **Ph.D. Chemistry**, *Texas Christian University*, Department of Chemistry, Fort Worth, TX.

Thesis: A Computational Toolkit to Understand Orbital Overlap and Chemical Reactivity

Advisor: Prof. Benjamin G. Janesko

Dec. 2011 **M.Phil. Physical Chemistry**, *Islamia University Bahawalpur*, Pakistan.

Thesis: Development of Ion Selective Electrode Based on Lambda Cyfluthrin

Sep. 2009 **M.Sc. Physical Chemistry**, *Islamia University Bahawalpur*, Pakistan.

Aug. 2007 **B.Sc. Chemistry, Mathematics, Physics**, *Islamia University Bahawalpur*, Pakistan.

## Research Experience

2021–2024 **Postdoctoral Associate**, *Stony Brook University*, IACS, Stony Brook, NY.

Advisor: Prof. Benjamin G. Levine

### First-principles Simulations of Ultrafast Spectroscopy Observables

I applied *ab-initio* non-adiabatic molecular dynamics simulations and GPU-accelerated Time-dependent Complete Active Space Configuration Interaction methods to simulate the excited state dynamics and time-resolved ultrafast spectrum of prototypical organic molecules.

### Partner with the NSF Center for Adapting Flaws into Features (CAFF)

I employ electronic structure methods to investigate the role of defects in materials and advance collaborative scientific approaches to harness the unique properties of these defects. The projects include modeling defect-driven photochemistry in carbon dots, quantifying hot-electron transfer efficiency in AuNR@TiO<sub>2</sub> core-shell heterostructures, and analyzing electronic coupling interactions between organic dyes and quantum dots interfaces.

2015–2020 **Doctoral Researcher**, *Texas Christian University*, Fort Worth, TX.

### A Computational Toolkit to Understand Orbital Overlap and Chemical Reactivity

The major Ph.D. project involved the development, implementation, and applications of the Orbital Overlap Range Function, EDR( $\mathbf{r};d$ ), and derived descriptors Orbital Overlap Distance, D( $\mathbf{r}$ ), and Atomic-averaged Overlap Distance, D<sub>A</sub>. Implemented these tools to MULTIWFN package and developed a FORTRAN based open-source program to compute these descriptors. Applied these tools to quantify the reactivities of molecular surfaces, nanoclusters, solvent softness-hardness, protein-ligand interactions, drug-development and bond stretching.

## Quantum Crystallography and Theoretical Modeling of Crystal Structures

This work focuses on the modeling of crystal structures and the integration of theoretical and experimental high-resolution charge density analysis for small molecules, drug structures, organometallics, and cocrystals utilizing single crystal X-ray diffraction. The investigation primarily entails identifying the topological characteristics of charge density, as well as quantifying electrostatic interaction energies and non-covalent interactions through the application of diverse theoretical methodologies.

2009–2011 **M.Phil. Researcher**, *Islamia University Bahawalpur*, Pakistan.

### Development of Ion Selective Electrode Based on Lambda Cyfluthrin

The M.Phil. research project was focused on the development, characterization, and applications of novel ion-selective electrodes based on Cyfluthrins for the determination of chloride ions concentrations in aqueous pharmaceutical samples.

2008–2009 **M.Sc. Researcher**, *Islamia University Bahawalpur*, Pakistan.

### Development of All-solid-state H<sup>+</sup> Ion-selective Electrodes

Worked on the synthesis of Polyaniline and its applications for the development of a pH electrode to determine H<sup>+</sup> ions concentrations in aqueous solutions.

---

## Teaching Experience

2015–2016 **Teaching Assistant**, *Texas Christian University*, Department of Chemistry, Fort Worth. TA for GenChem (30 students), PChem-I (12 students) and PChem-II (7 students).

2012–2015 **Lecturer of Chemistry**, *GC University Lahore*, Pakistan.

Taught undergraduate courses in PChem-I, PChem-II, Solid State Chemistry, Rotational and Vibrational Spectroscopy for classes of more than 50 students and a master's level course on Advanced Chemical Kinetics for a class of 24 students.

2009–2010 **Lecturer of Chemistry (visiting)**, *Islamia University Bahawalpur*, Pakistan.

Taught PChem-I and PChem-II courses for classes of more than 50 students.

---

## Awards and Honors

Aug. 2023 **NVIDIA GPU Award for Best GPU Poster (Finalist)**, *ACS COMP Division*, ACS Fall 2023 Meeting, San Francisco, CA.

Dec. 2020 **Outstanding Ph.D. Dissertation Award**, *College of Science & Engineering*, Texas Christian University, Fort Worth, TX.

July 2018 **TCU GSRF Travel Award**, *Computational Chemistry Gordon Research Conference*, July 22-27, 2018, Mount Snow, West Dover, VT.

Apr. 2018 **Best Oral Presentation Award**, *51<sup>st</sup> Annual Meeting-in-Miniature of American Chemical Society Dallas-Fort Worth Section*, April 21, 2018, Dallas, TX.

Mar. 2018 **Wiley Best Poster Award**, *27<sup>th</sup> Austin Symposium on Molecular Structure and Dynamics at Dallas*, March 3-5, 2018, Dallas, TX.

July 2016 **American Crystallographic Association Travel Award**, *66<sup>th</sup> Annual Meeting of American Crystallographic Association (ACA)*, July 22–26, 2016, Denver, CO.

Dec. 2014 **Best Teacher Award 2014**, *Department of Chemistry*, GC University Lahore, Pakistan.

---

## Leadership & Outreach

Apr. 2017 **Organizer**, *50<sup>th</sup> Annual Meeting-in-Miniature of American Chemical Society Dallas-Fort Worth Section*, April 29, 2017, Fort Worth, TX, USA.

Oct. 2016 **Volunteer**, *Chemistry Connections 2016*, October 14, 2016, Fort Worth Museum of Science and History, Fort Worth, TX.

- July 2016 **Invited Chair of the General Interest II Session**, 66<sup>th</sup> Annual Meeting of American Crystallographic Association (ACA), July 22–26, 2016, Denver, CO.
- Apr. 2014 **Organizer**, 1<sup>st</sup> International Conference on Forensic Science and Justice, October 21–24, 2014, GC University Lahore, Pakistan.

## Research Mentoring Experience

### NSF REU Students

2021-Present *Stony Brook University*: Kevin Torres (Ph.D. student, NYU), Trevor D. Lata (Researcher U. Arizona), Michael J. Rivera (U. Puerto Rico), Peter Scully (Tufts U.) and Ubaidullah S. Hassan (The Cooper Union).

### Undergraduate Students

2021-Present *Stony Brook University*: Pen Chang (Ph.D. student, Yale), Zain Zaidi (Stony Brook U.) and Nikita Basok (Stony Brook U.).

2018-2019 *Texas Christian University*: Alexandra Blitch (Advantis Global)

2013-2015 *GC University Lahore*: Sheher Bano (Teacher), Fatima Akbar (Teacher), Jamal Afzal (Postdoc Shandong U.), Mamoon Anwar (Teacher) and Saima Amin

### M.S. Students

2023-Present *Stony Brook University*: Satoshi Ohtsuka

2013-2015 *GC University Lahore*: Abbas Ali and Shahid Majeed (Assis. Professor)

### Ph.D. Students

2022-Present *Stony Brook University*: Eric Marants, Ari Pereira, Andrew Nicoll and Ying You.

## Professional Society Memberships

2016–Present American Chemical Society (ACS)

2019–Present American Physical Society (APS)

2016–Present American Crystallographic Association (ACA)

## Grants

Jan. 2025 **Allocation Proposal NREL Kestrel**, *Theoretical Insights into Fluorescence and Non-Radiative Mechanisms in Carbon Dots*, Approved with 150,000 GPU hours allocation.

Aug. 2023 **Allocation Proposal NSF ACCESS**, *Simulation of excited-state dynamics and ultrafast transient absorption spectrum of 2,2'-dihydroxy azobenzene*, Approved with 50,000 GPU hours allocation.

Mar. 2021 **Allocation Proposal NSF XSEDE**, *Simulation of ultrafast spectroscopy observables and excited state intramolecular proton transfer (ESIPT) dynamics of 1-Hydroxy-2-acetonaphthone*, Approved with 2,500 GPU hours allocation.

## Computational Expertise

Languages Proficient in: PYTHON, FORTRAN, BASH, Intermediate in: C++ , Wolfram Mathematica

Modeling Gaussian, CP2K, QUANTUM ESPRESSO, CRYSTAL, MOLPRO, OPENMOLCAS, TeraChem

## Certifications

Sept. 2023 **SciPhD Business of Science**, Stony Brook University.

June 2023 **Applied Machine Learning in Python**, University of Michigan.

May 2023 **College Teaching Seminars**, Stony Brook University.

## Peer-review Services

- [5] Journal of Chemical Physics

- [4] RSC Advances
- [3] Crystal Growth & Design
- [2] International Journal of Environmental Science and Technology
- [1] Spectroscopy Letters
